

STATIONARY POWER-DRIVEN REWINDING REELS

AE/AER

GB ELECTRICAL-DRIVEN REWINDING REEL: operation by pushbutton panel (AE) or remote control (AEV), both 24 V as per CE regulations. The electric geared motor is equipped with an adjustable electromechanical safety stop for both raising and lowering. It can be fitted on either the wall or the ceiling, also for heights of over 5 meters. Suitable for centralized extraction systems.

Attention: All the power-driven reels are equipped with upwards-downwards electric safety stops. The power-driven reels coupled with exhausters are equipped with dual control electric panel for the automatic start up of the exhausters

GB **ELECTRICAL-DRIVEN REWINDING REEL:** differs from the "AE/AER" model in the coupling with an "LAM" series electric exhauster. This model provides excellent extraction even with a hose up to 17 metres long. It is particularly suitable for use in workshops where autonomous workstations are needed. Exhausters switch-on/off is automatically regulated by the lowering/raising controls of the hose.
